

Prospects for Austria

04/2015  [Austria, Country prospects](#)

Table of contents

[Summary](#)

Summary

Demand for medium and highly - skilled labour is forecast to increase; while demand for low - skilled workers is forecast to decrease

Key facts:

- Austria's employment rate was 75.5% in 2013 – lower than the national 2020 target of 77-78% but in line with the EU-28 2020 target of 75%.
- Demand for medium and highly-skilled labour is forecast to increase; while demand for lowskilled workers is forecast to decrease. Employment is predicted to increase continuously over the coming years.
- Sectors with the highest growth in total employment are: business-related services, manufacturing, health and social services, freelancing, scientific and technical services as well as sales.
