

Prospects for Romania

04/2015  [Romania, Country prospects](#)

Table of contents

[Summary](#)

Summary

Significant labour shortages are anticipated in all occupations in the healthcare sector due to emigration, but also in the manufacturing, construction and hospitality sectors.

Key facts:

- Romania's employment rate was 63.9% in 2013 – lower than both the national 2020 target of 70% and the EU-28 2020 target of 75%.
- Employment growth in the next decade is anticipated to remain low overall, concentrated mainly in highly-skilled occupations and in elementary occupations.
- More jobs are to be created by 2020 in engineering and construction, the healthcare sector, and the economics and legal fields.
- Significant labour shortages are anticipated in all occupations in the healthcare sector due to emigration, but also in the manufacturing, construction and hospitality sectors.
