

## Education at a Glance 2013: OECD Indicators

01/2012  [People and Skills](#), [Matching Skills and Jobs](#), [Future Jobs](#), [Reports & publications](#)

As part of its response, the OECD Directorate for Education and Skills devotes a major effort to the development and analysis of the quantitative, internationally comparable indicators that it publishes annually in Education at a Glance.

These indicators enable educational policy makers and practitioners alike to see their education systems in light of other countries' performance and, together with the OECD country policy reviews, are designed to support and review the efforts that governments are making towards policy reform.

Education at a Glance addresses the needs of a range of users, from governments seeking to learn policy lessons to academics requiring data for further analysis to the general public wanting to monitor how its country's schools are progressing in producing world-class students. The publication examines the quality of learning outcomes, the policy levers and contextual factors that shape these outcomes, and the broader private and social returns that accrue to investments in education.
