New occupational analytical highlights offer valuable insights on the trends for skills as well as analyses of the drivers of change for a total of over 30 occupations.

They provide succinct information about the occupation, its future prospects and key trends in skills based on a thorough analysis of the most pertinent drivers of change as well as potential responses to the key skills challenges identified. Find them all online [here](#).

On top of the new analytical highlights, you can now use improved navigation and layout to explore all indicators, updated with more recent data, and a range of new indicators regarding the skills used at work. Further Skills Intelligence will be coming in the course of the next period. Stay tuned and visit regularly the [Skills Panorama](#).
