

Skills in online job vacancies

Skills in online job vacancies

The project [Big data analysis from online vacancies](#) looks at jobs and skills demand advertised by employers via online recruitment channels. The analysis is based on established international classifications: [ISCO-08](#) for occupations, [NUTS-2](#) for regions and [ESCO](#) version 1 for skills and is currently available for 7 European countries [here](#). Access the full results [here](#)
